DETAILED ACTION

Terminal Disclaimer

The terminal disclaimer filed on July 14th, 2005, disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of application number 10/607994 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Allowable Subject Matter

Claims 1-30 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record neither teaches nor reasonably suggests a radiation therapy device, or method of changing a spatial dose distribution, having a source carrier of radioactive sources surrounding a collimator body having passages that direct radiation from the sources to a common focus, where at least a subset of the sources are relatively displaceable with respect to the collimator passages while other subsets of the sources remain stationary, thus providing variations in the spatial dose distribution surrounding the focus, as required by the combination claimed in each of claims 1 and 20.

Claims 2-19 and 21-30 are allowed by virtue of their dependency.

Art Unit: 2882

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
